DETAILED ACTION

*Response to Amendment***OFFICIAL**

1. The amendment filed on 11 April 2002 (Paper No. 11) has been entered.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Applicant's arguments filed 11 April 2002 (Paper No. 11) have been fully considered but they are not found persuasive.

Claim Rejections - 35 USC § 103

4. Claims 2, 4-6, and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cheatham et al. (U) in view of Jhun et al. (V).

The reason for the rejection was set forth in the previous office action.

Newly amended claims and the new claim limitations are still taught by Cheatham et al. and Jhun et al. as discussed in the last office action.

Applicants argue each reference separately as not teaching all the claim limitations. However, with respect to the argument against the references individually, it is noted that the

references are not relied on for what they teach individually, but rather for what they teach collectively. Cheatham et al. and Jhun et al. teach collectively all the limitations of the claims.

Applicants argue that it would have been obvious to try to combine the teachings of the reference. However, the motivation for combining the teachings of the reference was set forth in the previous office action. One of ordinary skill in the art would have been motivated to use the teachings of Jhun et al. because of the expressed interest of Jhun et al. to understand the relationship between SH2 domain interaction with both mitogenesis and the metabolic effects of insulin in insulin responsive tissues (page 7472, right column). Furthermore, one of ordinary skill in the art would have been motivated to combine the references because the references are analogous art.

Applicants argue that the expectation of success of the combined teaching is not absolutely predictable of success until reduction to practice. However, the standard for expectation of success is not absolute predictable success. The techniques of the references were well known to one of ordinary skill in the art.

5. No claims are allowed.

6. Applicant's amendment necessitated the new ground(s) of

rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.** See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
